

SCHOOLGY FOR PARENTS

Using Parent Access Codes to Create your Schoology Account

In our classes, we use Schoology to keep track of homework, submit assignments, conduct online discussions, and to communicate with one another. We would really like it if the parents joined Schoology as well.

With a parent account you can view your child's homework including overdue assignments, see the homework they submit, and track your child's progress towards mastering learning standards.

To create your own Schoology parent account, go to <http://www.Schoology.com> and follow these directions:

Step One:

On the Schoology home page click on Sign Up then click on Parent.

Step Two:

Enter the Parent Access Code for your child. You will have received this code in a letter from your child's Caomhnóir. If you do not know this code, contact your child's Caomhnóir for assistance.

Step Three:

Enter your email address and create a password.

That's it – you're now signed up for Schoology. You can add additional children once you are logged into Schoology. Each child has their own code, but you can access them all through one parent account.
